CONTENTS

What is in this guide

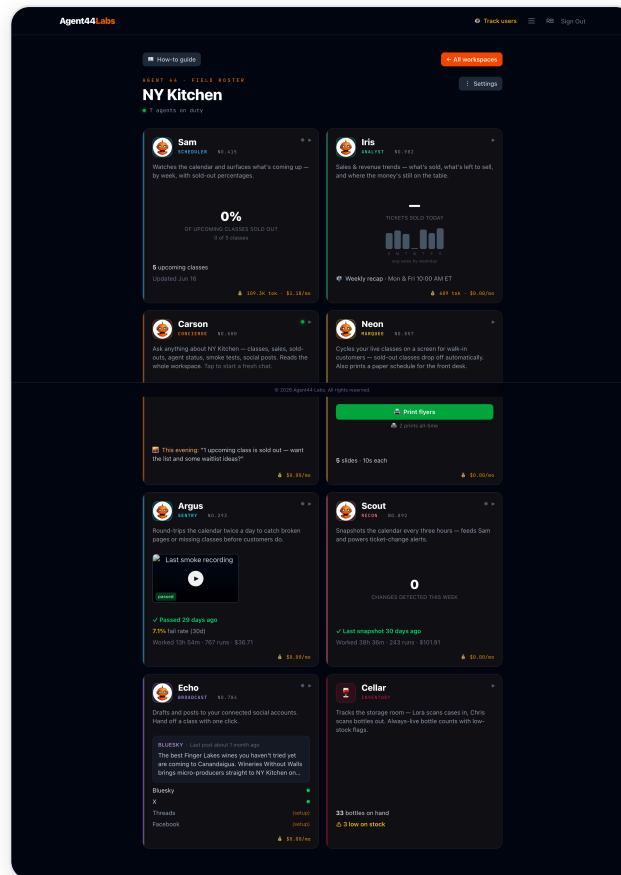

Each agent has its own page. Everyone on the team can use these.

1	Getting in & your workspace	your home screen
2	The List (Sam): your week at a glance	classes & sales
3	Class packets: what they are & how to add one	recipes + gear
4	The packet editor: Recipes tab	edit & print
5	Equipment Items tab	gear per station
6	Pull sheet tab	shop & prep, print
7	Grocery list & receipts	shopping

1 — GETTING IN

Your NY Kitchen workspace

After you sign in at **agent44labs.com** and open NY Kitchen, you land on your workspace. Every agent is a card, and the ones you open most float to the top.

Your workspace. Each card is one agent, with its own profile photo: Sam the list, Neon the display, Echo for social, and more.

HOW TO GET HERE

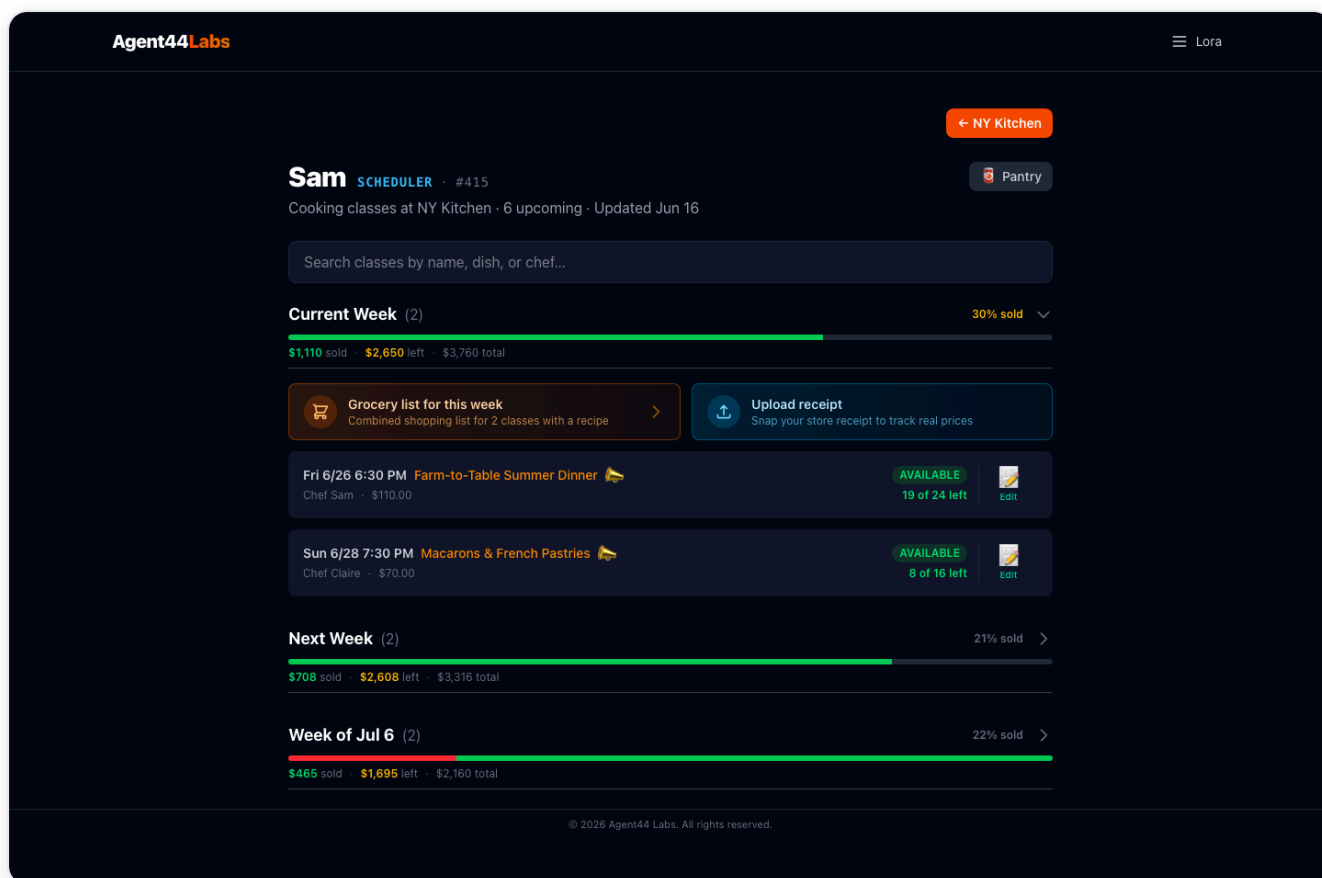

- 1 Open the app (or go to **agent44labs.com**) and sign in with your email. We send a 6-digit code, so there is no password to remember.
- 2 Tap **NY Kitchen** to open your workspace.
- 3 Tap any card to open that agent. The **NY Kitchen** button (top right on every page) brings you back here.

Tip: The cards reorder themselves to float your most-used agents to the top, so your workspace may look a little different from a teammate's. You can grab this guide any time from the **How-to guide** link at the top of your workspace.

New: every agent now has a profile photo. **MANAGERS** can give any agent its own picture from **Settings** on this page, under **Agent photos**.

Your week at a glance

The List shows every upcoming class, grouped by week, with how well each is selling. This is the page most people open first thing.

A week opened up: each class shows the time, chef, price, seats left, and quick buttons.

WHAT YOU CAN DO

- 1 Tap a week (like **Current Week**) to open or close its classes. The colored bar shows how much of that week is sold.
- 2 Use the **search box** to jump to a class by name, dish, or chef.
- 3 Tap the small 📣 next to a class name to draft a social post promoting it.
- 4 On the right of each class, tap **Add** and Sam drafts a starter recipe for that class automatically, or tap **Edit** to open one you already have (recipes, printing, and the pull sheet all live in the **packet**).
- 5 Tap the orange **Grocery list** card for the week's combined shopping list, or **Upload receipt** to track real prices.

Good to know: Dollar amounts (sold, left, total) are shown to owners and managers.

Class packets

A **packet** is everything for one class in one place: its **recipes**, the **equipment** to set up at each station, and the **pull sheet** (shopping and prep list). You make a packet from a class on Sam's list by tapping **Add**.

TAP ADD AND SAM DRAFTS IT FOR YOU

When you tap **Add** on a class that has no recipe yet, Sam writes a starting recipe from the class name, plus a suggested equipment list, and drops you straight into the editor to review and tweak. You will see a quick "**Agent Sam is generating a recipe for you**" message while it puts together the recipe, equipment items, pull sheet, and grocery list.

- **Repeating classes carry forward for free.** A class like Chef's Table reuses the last run's recipe at no cost. Your edits stay on this run; the next run copies the most recent one.
- **It only drafts when it is worth it** for classes within about six weeks, or already selling, so browsing far-off classes never runs up a bill.

Managers: auto-drafting is on by default. You can turn it off (back to the manual options below) from the on/off switch on the **Billing** page.

PREFER TO USE YOUR OWN?

On any drafted recipe, tap **Replace with my own (PDF, paste, link, or copy)** at the top of the editor to swap it for yours:

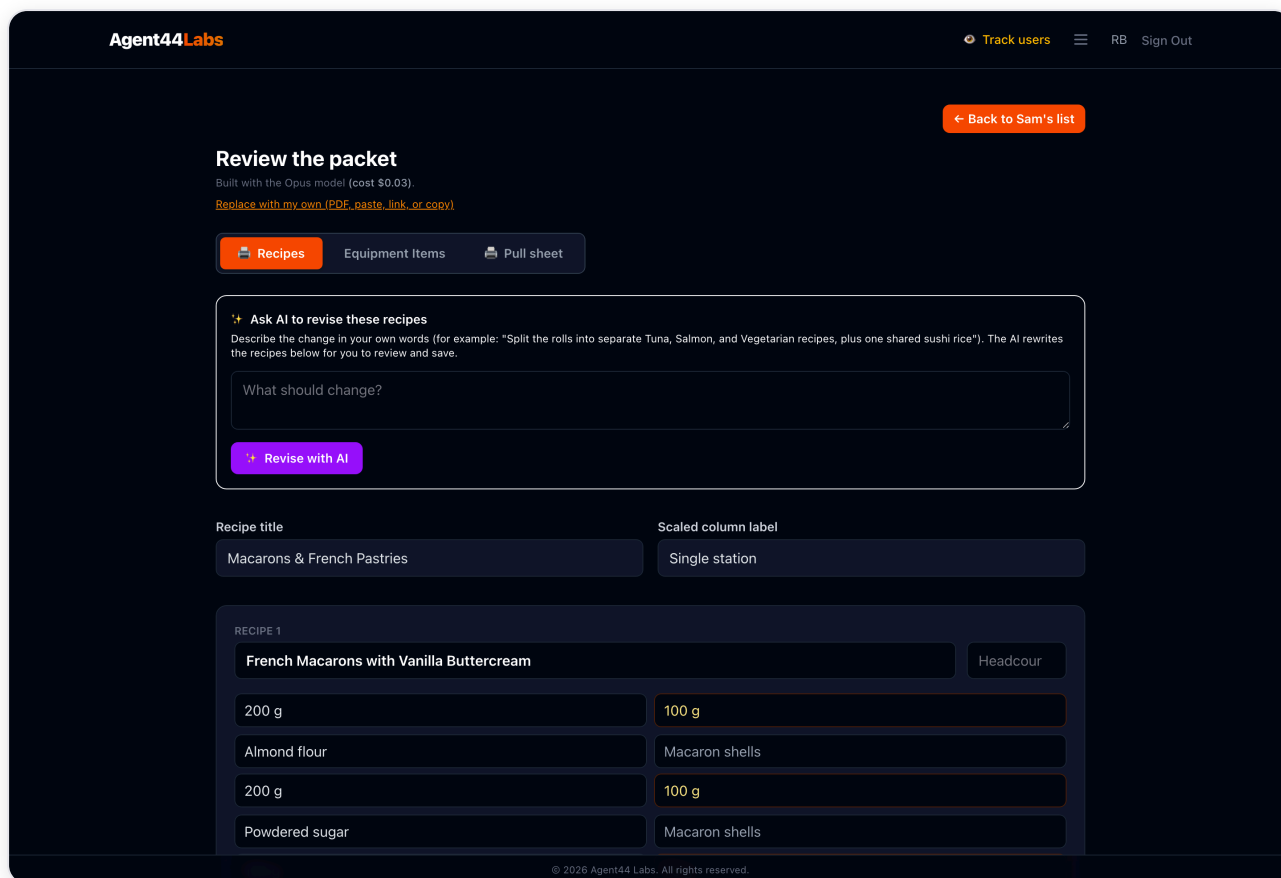

The screenshot shows the 'Add a packet' interface for a class named 'Summer Harvest Dinner'. At the top right is a button labeled '← Back to Sam's list'. Below the title, there's a section for AI-generated recipes with a button 'Generate recipe with AI' and explanatory text. Below that is an 'Upload a recipe PDF' section with a dashed box for file upload and instructions. This is followed by a 'Paste a recipe link' section with a text input field containing 'https://...' and instructions. Then, a 'Paste the recipe text' section with a text input field containing 'sauce)'. At the bottom, there is a copyright notice: '© 2026 Agent44 Labs. All rights reserved.'

The replace page: upload a PDF, paste a link or the text, or copy an existing recipe at the bottom.

- **Upload a PDF** of a recipe and the assistant reads the ingredients and steps for you.
- **Paste a web link** to a recipe page, or **paste the text** straight in.
- **Copy an existing recipe**: search and tap **Copy** to start from one you already have. Your edits stay on the new class; the original is untouched.

Recipes tab

Opening a packet (tap **Edit** on a class, or land here after Sam drafts one) shows three tabs: 🖨️ **Recipes**, **Equipment Items**, and 🖨️ **Pull sheet**. This page covers Recipes; the next two cover the others.

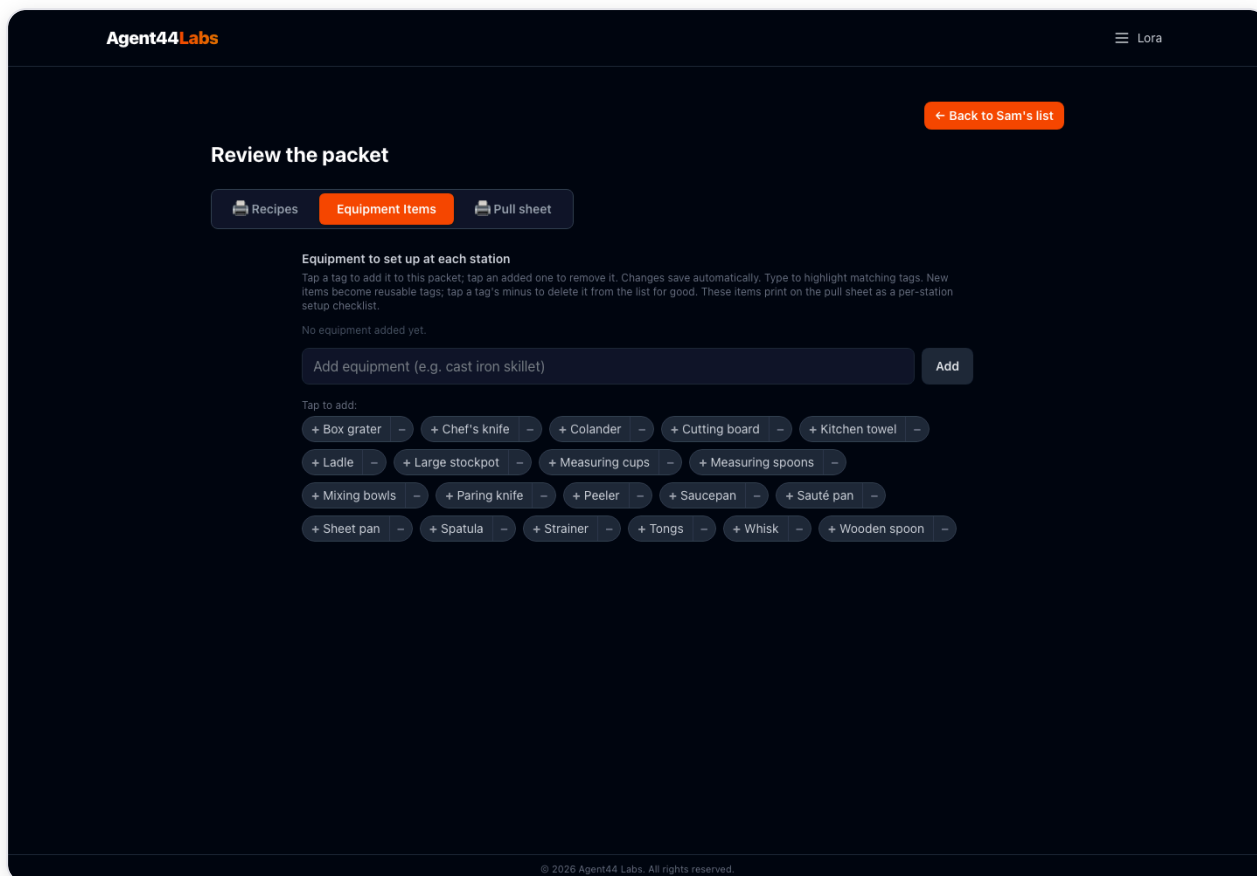

The Recipes tab. The line at the top shows it was built by Sam (and the small cost), with **Replace with my own** to swap in your own recipe.

WHAT YOU CAN DO

- 1 Edit the **title**, ingredient amounts, and directions. Each recipe shows a full-batch and a per-station amount, and can carry its own headcount so amounts scale correctly.
- 2 **Ask AI to revise:** type a quick instruction (e.g. "split the rolls into Tuna, Salmon, and Vegetarian") and tap **Review with AI**.
- 3 Tap **Print recipes** for the branded printout (pages labeled Dual station and Single station).
- 4 **Delete this packet** at the bottom removes it for good (with a confirmation).

The gear to set up

The **Equipment Items** tab lists the equipment to set up at each station for the class. It does not print on its own; it shows on the pull sheet as a per-station setup checklist.

Tap a tag to add it; tap an added one to remove it. Common gear is preloaded, and the list grows as you add new items.

WHAT YOU CAN DO

- 1 Tap any tag under **Tap to add** to put it on this packet; tap an added tag to remove it.
- 2 Type a new item and tap **Add** to create a tag you can reuse on other packets.
- 3 Changes **save automatically**, no Save button needed.

Tip: equipment lives on the packet, so it follows the class to every run and prints on each pull sheet.

The class shopping & prep list

The **Pull sheet** tab is everything to pull and prep for that one class: the ingredients, scaled to how many are booked and grouped by aisle, plus the equipment checklist per station.

NY Kitchen Pull Sheet Jun 26

Farm-to-Table Summer Dinner

PRODUCE

- ☐ 3 Zucchini, sliced
- ☐ 3 Eggplant, sliced
- ☐ 1 1/2 pints Cherry tomatoes
- ☐ 3 T Fresh herbs, chopped
- ☐ 6 cloves Garlic
- ☐ 3 T Fresh dill, chopped
- ☐ 3 T Lemon juice

DAIRY AND REFRIGERATED

- ☐ 1 1/2 c Greek yogurt

MEAT AND SEAFOOD

- ☐ 6 Chicken thighs

PANTRY AND DRY GOODS

- ☐ 1/2 c Olive oil

TO TASTE / ON HAND

- Salt

The pull sheet for one class, with checkboxes to tick off as you pull each item.

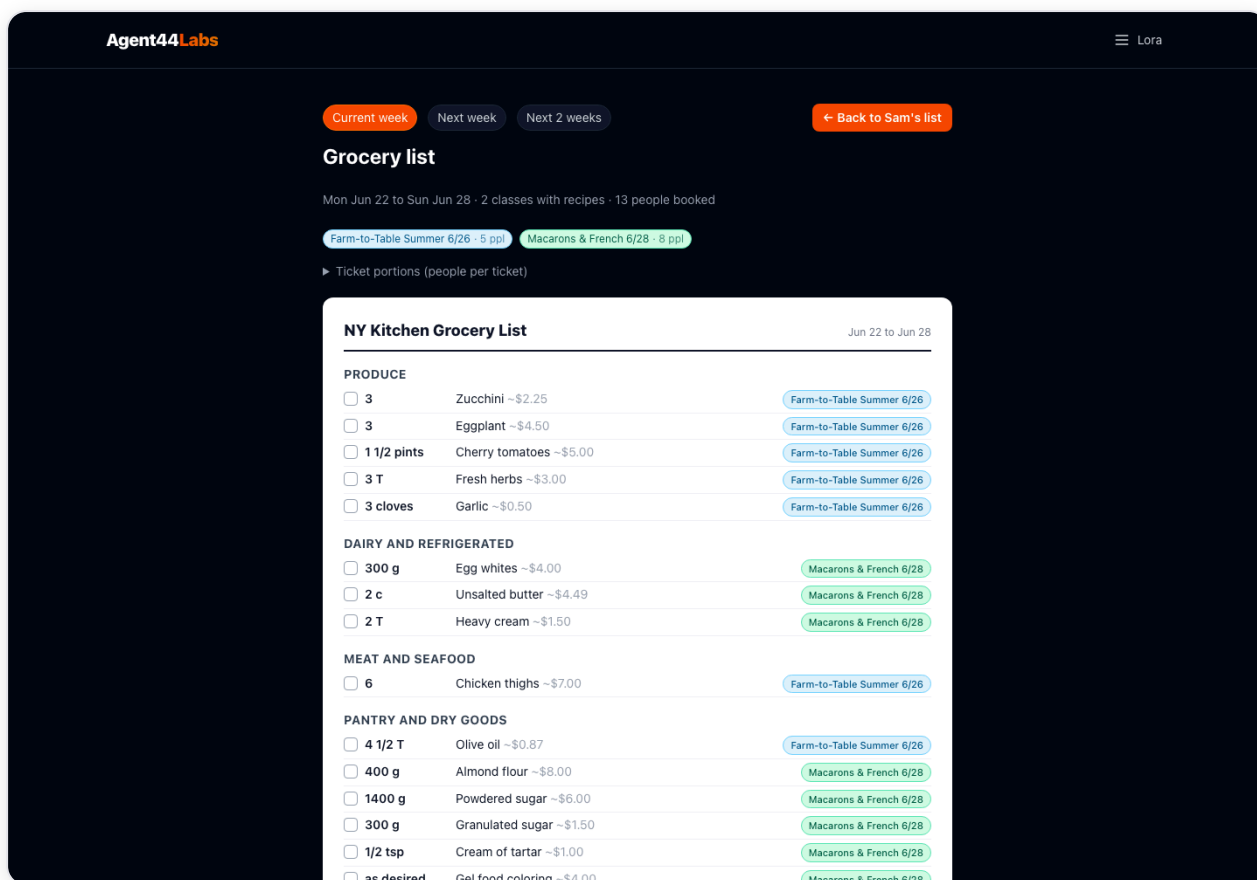

WHAT YOU CAN DO

- 1 Review the list, grouped by aisle (produce, dairy, meat, and so on), with the per-station equipment at the bottom.
- 2 Tap the green **Print** button to print it. (On the iPad or iPhone app it opens in Safari, where printing works.)

Note: the pull sheet appears once the packet is attached to a class. For a class shared across runs, a date dropdown picks which run to show.

Grocery list & receipts

The Grocery list combines every class that has a recipe into one shopping list, scaled to how many people are booked, so you buy the right amount.

A week's combined list, grouped by aisle (produce, dairy, meat, and more), with an estimated total at the bottom.

WHAT YOU CAN DO

- 1 Pick a range with the pills: **Current week**, **Next week**, or **Next 2 weeks**. (A single class's "Pull Sheet" opens here too.)
- 2 Read the combined list. Each ingredient is added up across all the classes in the range.
- 3 Print or download the list for the store.
- 4 After shopping, upload your receipt so the next estimate uses real prices.

Why the total may be blank at first: The estimated total appears once you have opened that week's grocery list once. After that it shows on the orange card on the List page.

NEED A HAND?

That's the tour

You now know the everyday agents in your NY Kitchen workspace. A quick recap of the daily rhythm:

- **Morning:** open **Sam** (the List) to see the week and what needs attention.
- **Prep:** attach **recipes** to classes and print the packets.
- **Shop:** pull the **grocery list** for the week, and upload your receipt after shopping.
